PROFESSIONAL SUMMARY

Fresh Informatics Technology graduate with a 3.90/4.00 GPA and internship experience contributing to a Campus Reservation system. Builds full-stack web applications from responsive interfaces to APIs and relational databases using Next.js, TypeScript, React, Laravel, PHP, Go/Fiber, PostgreSQL, and MySQL/MariaDB. Applies authentication, role-based access, QR-enabled workflows, testing, and debugging practices to produce maintainable, user-focused software.

PROFESSIONAL EXPERIENCE

Web Developer Intern - PT Microdata Indonesia

Dec 2025 - Feb 2026

Campus Reservation Project | Next.js, TypeScript, Go/Fiber, PostgreSQL, JWT, QR workflows

- Contributed to a web-based campus facility reservation system covering availability, booking requests, administrative approval, attendance verification, and reporting.
- Developed reservation workflows and CRUD functionality for facilities, bookings, user profiles, and reservation records.
- Implemented JWT authentication, role-based access, booking approval flows, and QR-based check-in and check-out handling.
- Tested features, investigated defects, and collaborated with the development team to improve application reliability and usability.

SELECTED PROJECT EXPERIENCE

Full Stack Developer - Sistem Rapor

2026

Laravel 12, PHP 8.2, Blade, Tailwind CSS, MySQL/MariaDB, Laravel Breeze, DomPDF

- Built a server-rendered academic reporting system that manages classes, students, teachers, subjects, grades, statistics, and report cards through role-specific workflows.
- Modelled six domain entities with Eloquent relationships, migrations, and seeders to support repeatable database setup and consistent academic records.
- Enforced separate administrator and teacher access through Laravel Breeze authentication and custom role middleware, with public registration disabled to protect grade-management functions.
- Implemented resource controllers and Blade interfaces for master-data management and grade entry, then generated browser-viewable and downloadable PDF report cards from the same stored records using DomPDF.

Developer - Full Stack Portfolio Redesign

2026

Next.js 16, React 19, TypeScript, Tailwind CSS, Vitest, Testing Library, Vercel

- Rebuilt a Create React App portfolio as a static-first Next.js App Router site with strict TypeScript and one typed content source shared across project, work, and about routes.
- Added responsive and accessible UI states, static case-study generation, route metadata, JSON-LD, Open Graph, sitemap, robots handling, optimized images, and tests for navigation, content, SEO, and link contracts.

Researcher - Player Clustering with K-Means

2025 - 2026

Python, Jupyter, scikit-learn, K-Means, Data Analysis

- Prepared survey-style data, evaluated cluster counts, and interpreted player segments by game-feature preference and business model in a reproducible undergraduate thesis notebook.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript ES6+, React, Next.js, TypeScript, Tailwind CSS, Blade, Vite, responsive UI, accessibility

Backend: Go, Fiber, PHP, Laravel, REST API development, JWT authentication, OTP workflows, RBAC, Laravel Breeze

Data: PostgreSQL, MySQL/MariaDB, SQL, relational data modelling, migrations, seeders, Python, Jupyter, scikit-learn, TensorFlow, Keras

Engineering: Git, GitHub, Docker Compose, Swagger/OpenAPI, Vitest, Testing Library, PHPUnit, ESLint, Vercel deployment

EDUCATION

Universitas Nahdlatul Ulama Lampung (UNU Lampung)

GPA: 3.90 / 4.00

Informatics Technology - Fresh Graduate
